

Hello Avonair Members,

I would like to provide a quick update as to the state of the ice plant. We have received several quotes for a replacement chiller, however, the timelines for replacement will not allow for sufficient time to resume play this season at the Avonair. Therefore, the Board has decided that it will be best to play out the season at the respective clubs that your leagues are currently playing at.

The Board and our Management team will be continuing to work to find a viable solution to move forward with. I would like to thank everyone for their patience this season as we navigate our challenges with the ice plant and I would also like to thank all the clubs that are hosting our leagues allowing us to play this year.

Fred Greenhough

President, Board of Directors
